

If sections are highlighted they have their own videos. Please click on enhancement reference number to view in YouTube.

|         |                         |  |
|---------|-------------------------|--|
| 2016.09 | PS-375                  | Support for SolidWorks 2017  |
| 2016.09 | PSE-213                 | Tool to process all models and drawings in a DDM database to open each in SolidEdge and re-save, to update internal file formats to current SolidEdge release.               |
| 2016.09 | DDMC-5261               | Speed of routing server processing timeout / renotification actions on workflow folders is very slow on database with large quantity of folders and workflows.               |
| 2016.09 | DDMC-5262               | In DDM Admin - Workflows, an option to 'Show Inactive' workflows (disabled, by default, but remember users last selection).  |
| 2016.09 | DDMC-5263               | The ability to run custom stored procedures immediately before and after a state change is performed.  |
| 2016.09 | DDMC-5265               | In DDM Admin - Workflows, the workflow list scrolled up to the selected workflow, after editing (otherwise modified workflow is left off-screen!)                            |
| 2016.09 | DDMC-5215               | When showing where-used in the search results structure, padlock shown against folder in which the item is locked.   |
| 2016.09 | DDMC-5288               | When saving an advanced folder search, including date fields as a favourite or last-run search, the date field criteria are not retained.                                    |
| 2016.09 | DDMC-5297               | Tool to auto-generate missing neutral files for models and drawings created by IronCAD.  |
| 2016.09 | DDMC-5299               | An option to allow SAT / ACIS neutral files to be exported without the issue in the filename.  |
| 2016.09 | DDMC-5271               | A custom WCF service call upon Item State change (Pre and Post).   |
| 2016.09 | DDMC-5272               | When custom WCF service calls fail, an option for notification and error messages to be sent via email to a specific group of users, as well as logging in item audit trail. |
| 2016.09 | <b><u>DDMC-3908</u></b> | Advanced search options for folders to allow searching on date ranges.   |
