

Office to Enterprise Product Data Management

Most people in business create and maintain information on a daily basis, usually to be referred to or used by someone else.

Whether you are a small company or large multi-site enterprise, sharing your information in real time and in a controlled manner is critical to ensure a smooth running and efficient business.

The DDM Web client is the perfect interface to provide that real time access to documents and information throughout your enterprise and supply chain.

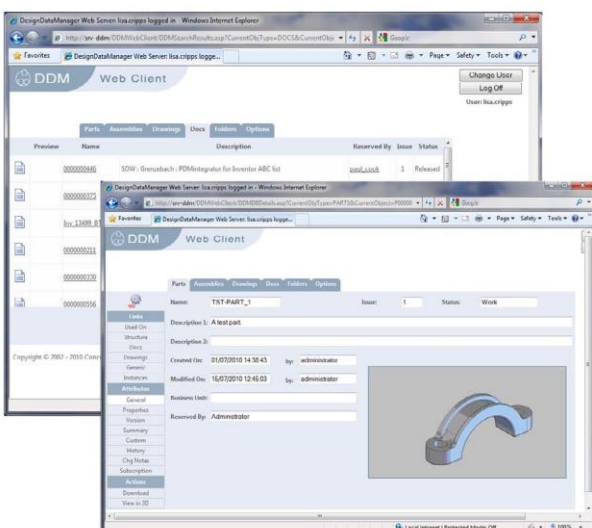

Key Features

- Easy to use browser interface
- Simple and advanced search capabilities
- Product and Bill of Material structure browsing
- Subscriptions and notifications
- Supports AutoVue web client for view, rotate, section, mark-up and collaborate on 2D and 3D data.
- Supports DDM Business unit access controls.
- Apply your own corporate colours and Logo

Key Benefits

- Single unlimited multi user read only license
- No roll out costs
- Little to no user training requirement
- 24/7 access to Product information and documents
- Real time sharing of data on a global scale
- Ensure data integrity and secure access
- Automatically notify changes to date via subscriptions

The DDM web client is clear and easy to understand with little to no training requirement

Licensing and System Requirements

Data can be accessed by any authorised workstation using a standard web browser such as Internet Explorer, FireFox or Google Chrome.

This is regardless of the platform on which the browser is installed (PC, MAC or Unix), and without the requirement for DDM or any other application to be available on the client platform.
