

Case Study - Nick Hayler, Network Systems administrator

1. What benefits has DesignDataManager brought to your organisation?

Exactly what the product states 'Data Management'. We had no real management over our drawings before hand. Duplication, search/retrieve, etc were a nightmare.

2. What influenced your choice to choose DesignDataManager over alternative PDM systems?

The initial influence was cost. We were cornered into purchasing Pro/INTRALINK from PTC. This was overkill for our organisation and we could not afford to have a member of staff administrating this all week long. So the final answer would be Cost and Administration.

3. Has DesignDataManager directly influenced decreased development timescales at your company?

Along with the Pro/ENGINEER time to market has increased by about 20%.

4. Could you envisage working without data management? Please expand on this if you wish?

Not at all. Chaos springs to mind.

5. Please make any additional comments that you feel appropriate regarding DesignDataManager or of the CSI organisation/people.

Friendly, fair and supportive.

About Marshall-Tufflex

Marshall-Tufflex - originally called C & C Marshall - began life during the Second World War when acute shortages prompted the founder, Harold Cirket, to develop a range of innovative products. Farmers, car manufacturers, boat-builders, luggage makers and those in the electrical and construction industries were among the first to benefit from his man-made substitutes for materials in desperately short supply. Marshall-Tufflex are a leading manufacturer and supplier of quality Cable Management Systems. Our comprehensive trunking range incorporates systems manufactured from PVC-U, Aluminium and Steel which can be used for a variety of commercial and industrial applications.
