Release	En Number	Description	Notes
2018.09	PSE-182	The Solid Edge Ribbon bar to be properly grouped and laid out.	
2018.09	PSE-228	Support for Solid Edge 2019.	Support implemented for Solid Edge 2019 Note: Remember to 'Reconfigure CAD Support' when switching DDM support to a new CAD release.
2018.09	PS-411	Action Server functionality to generate neutral files for SolidWorks	Action Server and Client can now be configured to auto create SolidWorks neutral file formats on the server. Requires SolidWorks license on server or Action Client machine. Can be set to run between time periods.
2018.09	PS-426	Directory Import tool - If using part auto numbering, drawing numbers to match associated part.	
2018.09	DDMC-1852	Make certain folder attributes compulsory at certain steps in a workflow.	
2018.09	DDMC-1976	An option to disable certain users from password expiry policies.	Fixes issue with 'Password Does Not Expire' option against user accounts
2018.09	DDMC-2306	SQL Server DB security - Need to be able to change the default password to a more secure password.	Administrators can now define and set their own password for connection to the SQL database and DDM File Servers rather than the fixed 'out of the box' password set on earlier DDM releases.

2018.09	DDMC-3482	DB security - to be able to reset the desmgr database password.	Administrators can now define and set their own password for connection to the SQL database and DDM File Servers rather than the fixed 'out of the box' password set on earlier DDM releases.
2018.09	DDMC-4409	The option for comments to be compulsory when sending a folder through a workflow.	Users comments that appear in notification emails and the audit trail can be set as compulsory on specified steps in a workflow.
2018.09	DDMC-4568	When sending through a workflow, to be able to choose which (possibly multiple) of the receiving role members should be notified.	To avoid email spamming, you can now select who should be notified via when sending a folder to a new step in a workflow. Example is, you don't always want to email every user if a folder is sent to group ownership.
2018.09	DDMC-4847	Reserve / Reference Manager used, when reserving via AnyDocs save.	To provide more flexibility, the 'Reserve' button on the AnyDocs save dialogue Window now calls the 'Reserve To' Manager allowing the user to select which folder the document should be reserved to.
2018.09	DDMC-4859	In DDM Admin, to be able to Import / Export Attribute Lookup values (CSV/XML)	An attribute's look up list can now be exported to Excel, this can now be imported ('paste') to populate another attribute with the same look up values. In addition, the excel file can be edited to modify the list prior to import.
2018.09	DDMC-4948	2.2.6.5 Additional option to specify who gets email notification	To avoid email spamming, you can now select who should be notified via when sending a folder to a new step in a workflow. Example is, you don't always want to email every user if a folder is sent to group ownership.
2018.09	DDMC-5528	To be able to specify the auto-numbering rule to be used when importing models.	
2018.09	DDMC-5574	DDM Web - Dashboard - My Workflow Decisions	My workflow decisions and Deputy decisions can now be accessed via the new DDM web homepage Dashboard.

2018.09	DDMC-5714	Poor WAN Performance Properties Links-->Used On	Performance optimisation, specifically on wide area networks, where latency issues exist, no change in functionality.
2018.09	DDMC-5777	New DDM Administration Page Attributes->Parts & Assemblies	The DDM Administration 'Attributes/Parts & Assemblies' page has been migrated to the new DDM Admin module.
2018.09	DDMC-5778	New DDM Administration Page Attributes->Drawings	The DDM Administration 'Attributes/Drawings' page has been migrated to the new DDM Admin module.
2018.09	DDMC-5779	New DDM Administration Page Attributes->Documents	The DDM Administration 'Attributes/Documents' page has been migrated to the new DDM Admin module.
2018.09	DDMC-5839	DDM Database Replication performance improved, as current single-server method is poor on long latency and hinders collaborative working between sites.	Some customers with database replication were experiencing extremely slow replication cycles (the time taken to update all databases). For one particular customer this reduced the cycle time from around 26 minutes to around 3 minutes. Note: this is installation specific and not all customers will see performance improvements as marked as this.
2018.09	DDMC-5964	Install for DDM Web Client, when run manually or on separate server (e.g. DMZ) should prompt for necessary server details (defaulting to any details read from registry).	
2018.09	DDMC-6004	With attributes locked to either Numbering or Category, Single Save from CAD can become very slow	
2018.09	DDMC-6071	DDM Web - Upload - Document	In order to deliver the same functionality as the previous DDM Mobile web client, web users can now upload documents into an existing Folder or Divider in the new web client provided they have the required access controls.

2018.09	DDMC-6282	To include related folder and relevant information in the EUM output	
2018.09	DDMC-6417	Displaying audit history for a folder with a lot of content takes a long time to display.	Performance optimisation - no change in functionality.
2018.09	DDMC-6428	Desmgr + DDM Replicator SQL account permissions need to be minimised and locked to the DDM DB.	Previously, the default creation of the desmgr account on the SQL server installation granted full privileges to the account, over all aspects of the SQL server instance and databases it had access to. These permissions are now reduced to public access only, granting full permission only on the DesignDataManager database.
2018.09	DDMC-6431	"Document" action server conversion expanded to documents that have been converted to drawings.	If a Document in DDM is converted to a Drawing type object (e.g., drawings created in MS Word) the Action Server, if configured will now auto create a PDF.
2018.09	DDMC-6450	Restrict Dashboard Icons based for Team Members at Login	
2018.09	DDMC-6468	Poor WAN Performance - Logging in to DDM	Performance optimisation, specifically on wide area networks, where latency issues exist, no change in functionality.
2018.09	DDMC-6469	Poor WAN performance - Displaying folder properties	Improved performance opening Folder Properties on a WAN, Wide Area Network. EG, With 120ms WAN latency, testing using database provided by a customer the time reduced from 65.2 seconds to 10.4 seconds.
2018.09	DDMC-6474	Displaying folder properties for a folder with a large number of dividers, specific to the individual folder, is very slow and requires improvement.	Improved performance opening Folder Properties on a WAN, Wide Area Network. EG, with 120ms WAN latency, testing using database provided by a customer the time reduced from 65.2 seconds to 10.4 seconds.

2018.09	DDMC-6498	The ability to assign group ownership on a folder, in the same way as individual ownership can be assigned within the owning group. - Possible only if a folder is *not* in a workflow.	The ability to ""Assign to"" Group and User on a folder, in the same way as individual ownership can be assigned within the owning group. Only if a folder is not in a workflow.
2018.09	DDMC-6500	Additional Office formats added to action server, such as .docm	We have included the .docm format to be included in the Action Server formats so PDF's are automatically created. The long-term plan is to allow DDM Administrators to be able to specify the included file types as long as the 3rd party PDF conversion tool (not supplied by CSI) can support the format.
2018.09	DDMC-6503	When a folder is prevented from sending to the next step in a workflow, because of actions being at preventative states, the message should read "<FOLDER_TYPE> '<FOL_NAME>', '<FOL_DESC>' is at state '<FOL_STATE>', preventing sending to this step."	The format of the error message has been improved.
2018.09	DDMC-6547	Web Upload documents should be added to Users Recent Items	When a user or restricted user uploads a file using the new web client it will automatically be added to their Recent list.
2018.09	DDMC-6548	Support for DDM Web Client in a DMZ.	The new DDM Web client can be installed in the DMZ area of a Firewall in order to improve security in the open internet.
2018.09	DDMC-6571	The ability to store lookup attributes in a separate table, which can then be accessed by multiple item types.	An attribute can now point to another attribute's look up list and share the values defined on that (remote) attribute. This means that only one list needs to be maintained across multiple attributes.
2018.09	DDMC-6588	DDM Web - Dashboard - My Actions	Dashboard favourites have been added to DDM Web in line with the same favourites as DDM Office.

2018.09	DDMC-6592	DDM Web re-design card view and properties page top section	The card view for all items has been redesigned in the new web client to allow for a longer description along the top row and more relevant attributes in the main display.
2018.09	DDMC-6608	DDM Web - Dashboard - Folder Actions	New DDM Web client opening Dashboard now includes widgets to list, My Pinned Actions, My Actions, My Group Actions and My Accountable Actions.
2018.09	DDMC-6612	DDM Web - Search dropdown, separate Folders and Folder Actions with a line between them.	
2018.09	DDMC-6614	Update Web - folder properties page - Add 'Create new' and workflow icon to the backbar	
2018.09	DDMC-6615	DDM Web - In search results page (both cardView and gridView) if there is no data don't show empty card or grid	
2018.09	DDMC-6616	DDM Web - add ability to pin and un-pin folders	Allow all users including restricted "Team member" users to pin and ink on folders in the new web client. Access pinned folders via the homepage Dashboard.
2018.09	DDMC-6620	DDM Web - License check for R/W functions	For any function that needs to write to the database that was not included in the previous Web Client or Mobile Web client will require a license check. All new functions that write to the database will grab a DDM Office license for a minimum of 15 minutes before it returns to the license pool if no further write function is performed.

2018.09	DDMC-6631	DDM Web - Folders/Actions Assign Ownership / Return to Group	
2018.09	DDMC-6657	DDM Web - Dashboard - Pinned Folders for restricted users	Restricted Team Member web users can now pin and unpin folders. These can be accessed by the Dashboard on the home screen.
2018.09	DDMC-6661	DDM Web - localise all new labels added in DDM WEB	A full set of language files related to DDM Web are now available for localisation in the following location: C:\DesignDataManager\DDM_WEB\DDMWeb\App_Data
2018.09	DDMC-6665	DDM Web - Modify search results footer to be context sensitive	DDM Web will only show Download and Pin/Unpin options on the floating menu bar in the footer depending on the search result object types.
2018.09	DDMC-6668	Emails to include the email template configuration name as well as the internal vault filename, when viewing source.	Ability to see the email template name if you view the source of an email. This makes it easier for the DDM administrator to identify the correct email template in the admin tool if they want to edit the format. The name is added to the top of the page under the header section. Example; <!-- Template filename: \EmailTemplates\E04C69E3-4BBB-4ABF-98B4-AE5AC9BEA570.EMAIL_TEMPLATE_HTML.6 (WorkflowNotification-StepRecipients-Step.html) -->
2018.09	DDMC-6676	DDM Web - Change Workflow action page to popup	
2018.09	DDMC-6682	DDM Web - add pin/unpin to card view burger menu and remove download PDF for folders.	The ability to Pin and Unpin folders in DDM web has been added to the Card View Mini Burger menu and view PDF menu option has been removed as Folders/Actions do not have a PDF Preview.
2018.09	DDMC-6692	Get all contents (Item types) for current divider and all sub dividers.	

2018.09	DDMC-6700	Right-click menu for Actions updated to include Pin/Unpin options on search results and folder properties - actions tab.	
2018.09	DDMC-6704	To be able to modify the default password on file servers.	Administrators can now define and set their own password for connection to the SQL database and DDM File Servers rather than the fixed 'out of the box' password set on earlier DDM releases.
2018.09	DDMC-6722	DDM Web - add workflow button to cardview burger menu	
2018.09	DDMC-6724	The separate prompts and options for 'Assign To' and 'Workflow / Send Folder To' (for folders not in a formal workflow) to be merged to a single Assign To prompt, allowing both user and group assignment.	
2018.09	DDMC-6726	DDM Web - Sort search results date for Dashboard Action type search	
2018.09	DDMC-6736	Custom workflow xml file to be formatted with indentation to make it easier to read and edit manually.	
2018.09	DDMC-6739	DDM Web - get rid of all alert pop up messages saying something has successfully done.	

2018.09	DDMC-6740	Localise all the new static labels and texts added recently to web client	
2018.09	DDMC-6741	To be able to set the default group owner of actions, when automatically created at steps in workflow.	To be able to set the default group owner of actions, when automatically created at steps in workflow Rather than being owned by the Owner Group of the parent Folder. This enables the ability to assign to different Groups and Users.
2018.09	DDMC-6743	DDM Web - add license check to 'Assign to' & 'Return to Group'	
2018.09	DDMC-6744	DDM Web - Card view - move the select checkbox to the bottom right corner	
2018.09	DDMC-6745	In DDM Admin, when importing a custom workflow xml file, the file to be verified as well formed and for missing tags, etc.	
2018.09	DDMC-6748	Right-click menu options for Folder Actions (in search results or Folder Properties - Actions tab) should always include the 'Assign To' option as well as 'Workflow' option.
