

Highlighted sections have their own videos. Please click on enhancement reference number to view in YouTube.

2017.10	<b><u>DDMC-310</u></b>	To be able to store information on the relation between a folder and its contents (link-level attributes).
2017.10	<b>DDMC-3993</b>	DDM Import tools should be enhanced to merge the older-style Folder Import tools.
2017.10	<b>DDMC-4513</b>	The DDM Data Import tool enhanced to improve speed of import and reduce database replication entries.
2017.10	<b>DDMC-4546</b>	An automatic PDF generator for MS Office documents. (e.g. Action Server to automatically create PDF copy of docs)
2017.10	<b><u>DDMC-4600</u></b>	To be able to return a folder to a specific group member or re-assign to another group member, as well as the default of only being able to return to the group or assign to self.
2017.10	<b><u>DDMC-4699</u></b>	Sequential order of states to apply in DDM Admin Tool
2017.10	<b>DDMC-5043</b>	When sending to a step in a workflow, if there are custom xml pre-requisite checks then these should be performed on selecting destination step, not after trying to send.
2017.10	<b><u>DDMC-5181</u></b>	Audit on automatic state change of an item, when driven by workflow to include details of the folder and user that caused the state change.
2017.10	<b>DDMC-5244</b>	Option in Administration tool to switch to old style free search.
2017.10	<b><u>DDMC-5287</u></b>	To be able to store information on the relation between a folder and it's contents (link-level attributes) to determine whether an item should be auto-replaced with later issues when created.
2017.10	<b><u>DDMC-5320</u></b>	The ability to verify email address against restricted web login accounts are still valid, after password timeout.
2017.10	<b>DDMC-5377</b>	With include Drawing PDFs turned on, Drawing PDF files should only sent for drawing records which have had EUM triggered directly on those drawing records or drawings which appear in the "DRAWINGS" section of the part or assembly xml file.

2017.10	<b><u>DDMC-5485</u></b>	The ability to use a single, shared numbering system shared between multiple replicated DDM database sites.
2017.10	<b>DDMC-5547</b>	When creating a new item, with 'Prompt for folder' option enabled, the prompt for destination folder should be made after prompting for an item number (if automatic numbering enabled).
2017.10	<b>DDMC-5548</b>	Single Save Manager - the 'Action - New' renamed to 'Action - Save New' and 'Action - New Issue' renamed to 'Action - Save New Issue'
2017.10	<b>DDMC-5549</b>	When showing Change Reason form (from Single Save or Issue Manager), the focused field to be Change Number, Short Description or Long Description (first empty of those fields)
2017.10	<b>DDMC-5584</b>	When using custom xml workflow configuration options, any automatic workflow actions performed as the "RoutingServerUser" to bypass permission requirements of the current user.
2017.10	<b>DDMC-5585</b>	Spaces allowed in the Issue numbers.
2017.10	<b>DDMC-5586</b>	Using workflow custom xml, an option to default / determine the destination step owner, based on folder attribute selections.
2017.10	<b><u>DDMC-5588</u></b>	DDM Administration - a 'Help – About' page implemented, to show DDM version and build numbers.
2017.10	<b>DDMC-5591</b>	DDM Administration - When importing/exporting workflow configuration or terms and conditions, confirmation when completed successfully.
2017.10	<b>DDMC-5635</b>	When using custom workflow xml to define folders being created and referenced as sub-folders, the ability to specify the divider in which to be placed.
2017.10	<b><u>DDMC-5678</u></b>	The attachments in search results to have icons appropriate to their file type and local associated application.
2017.10	<b>DDMC-5704</b>	Showing Reserve Manager can be very slow / take a long time to show, when lots of folder types are available.
2017.10	<b><u>DDMC-5711</u></b>	Business units structure to only show populated groups by default, with a checkbox to show all

2017.10	<b><u>DDMC-5712</u></b>	Group structure to only show populated business units by default with a checkbox to show all
2017.10	<b><u>DDMC-5718</u></b>	DDM Admin - the number of items / rows and number of selected items / rows in the tables, shown on the window footer (e.g. number of users and number of selected users in list).
2017.10	<b>DDMC-5722</b>	Using workflow custom xml, an option to default / determine the destination step owner, based on folder attribute selections (specific member of group, not just Group).
2017.10	<b><u>DDMC-5736</u></b>	With database replication enabled, email notifications sent after replication has completed, to ensure all items available in local replicated databases to the email recipients.
2017.10	<b>DDMC-5740</b>	When using csv import to create records with CAD files attached, to be able to specify file type and version.
2017.10	<b><u>DDMC-5746</u></b>	Allow Auto numbering to be allocated from a single central server
2017.10	<b>DDMC-5753</b>	Folder searches take a long time to complete, compared to item searches, especially when in a WAN environment.
2017.10	<b>DDMC-5759</b>	When moving mouse over a workflow preview, hovering over a step shows the step instructions as a hint, but should not repeatedly query the database as the mouse is moved.
2017.10	<b>DDMC-5771</b>	When running manual database replication, the progress window to be resize-able / maximise-able.
2017.10	<b>DDMC-5773</b>	Selecting the 'Workflow' tab on a folder with a large workflow audit history can take a long time to show the workflow.
2017.10	<b>DDMC-5774</b>	The emails which include folder audit trail information to be limited to the most recent 20 entries (longer audit histories generate very large emails and are very slow to send).
2017.10	<b><u>DDMC-5791</u></b>	New DDM Administration Page System -> Email
2017.10	<b>DDMC-5836</b>	Additional ACL for 'CanUplIssue' permission.

2017.10	<b>DDMC-5837</b>	The ability to combine XML based checks when moving through workflow using AND/OR combinations via an SQL_QUERY type entry.
2017.10	<b><u>PI-172</u></b>	The file clean up on model close from IronCAD to be restricted to only those files in the working directory.
2017.10	<b>PI-177</b>	The generation of PDF during save removed and the inbuilt PDF extracted from the drawing instead - to improve performance on drawing save.
2017.10	<b><u>PP-417</u></b>	When performing Save-As from Creo to DDM on a model and including drawings, drawings renamed to match the new model names before prompting for new drawing properties.
2017.10	<b><u>PP-425</u></b>	The file clean-up on model close from Creo to be restricted to only those files in the working directory.
2017.10	<b><u>PS-376</u></b>	Ability to save '.STL' file from SolidWorks as a neutral file attachment.
2017.10	<b>PS-394</b>	The ability for SOLIDWORKS PDMIntegrator to communicate with DDM via TCP Sockets as an alternative to DDE (for use when SW is used for very large assembly storage and processing).
2017.10	<b><u>PS-401</u></b>	A client config option to override the exclusion of envelop parts in BOM.
2017.10	<b>PSE-224</b>	Support for Solid Edge ST10.
