

NEWBURY, Berkshire, UK, August, 2008 - Concurrent Systems Inc Ltd, a leading developer of design data and document management solutions today announces that Unwin Safety Systems, the world's leading passenger safety systems company, has decided to invest in DDM to provide a comprehensive design data/document management and sharing solution for SolidWorks®.

“Unwin Safety Systems selected DDM as a Product Data Management solution to provide real control over new design projects, all our CAD data and most importantly a complete track of our engineering change sign off process. It will bring a completely new way of working and is truly a great step forward in making Unwin number one in our field”, says Rob Butcher, Director of Engineering. Rob added 'Historically we have used a manual system which has delivered to our requirements but we have identified in DDM attributes such as time saving, cost effectiveness and more control that will help us to achieve increased performance. This is key to working towards the Unwin vision.”

About Unwin Safety Systems

Unwin Safety Systems was set up 50 years ago by Norman Unwin, who created the world's first device to secure wheelchairs in vehicles. Over the years, the company has continued to grow and today it occupies a 3000sqm. factory in Somerset, with modern manufacturing, design and testing facilities. Throughout this period of continued growth, the Company has been at the forefront of developments to improve safety for wheelchair users, and in designing innovative systems to increase the strength of vehicles. Unwin Safety System is a worldwide business. As well as being the UK market leader, the company has built up an extensive export activity across the developed world through a distribution network spanning over 40 countries in 5 continents.

About DDM

DDM is an easy to use, multi-CAD PDM solution for Solid Edge®, IronCAD®, SolidWorks®, Creo Parametric®, AutoCAD® and Inventor®. Providing full lifecycle management and revision control of parts, models, drawings and office documents. DDM ensures that the right information is delivered to the right people at the right time.

DDM is a scalable system that grows in line with your needs. At a basic level it can be used as a file vault with simple access controls ensuring data integrity. At an advanced level it can satisfy the needs of a global multi-site organisation with document, project and process management. DDM provides a complete electronic audit trail of change and release history, helping you meet your compliance obligations.

The DDM philosophy is focused on delivering a solution to have you productive within hours, without the expensive and lengthy implementation times normally associated with PDM installations. Cost of ownership is minimised through low on-going maintenance, centralised backup and simple fast upgrades.

About CSI

CSI develop and market DDM to SME businesses globally. With over 20 resellers worldwide, we provide you with professional and local service enabling you to achieve your goals without fuss. With over 20 years' experience in the industry, we pride ourselves on our strong customer focus, professional global support, in-depth product knowledge and quick solution implementation.
